

Learn to Dive online with **PADI** eLearning®

Become a certified PADI Open Water Diver so you can have the freedom to dive nearly everywhere.

PADI Discover Scuba Diving Participant Statement

Read the following paragraphs carefully. This statement, which includes a Medical Questionnaire, a Liability Release and Assumption of Risk Agreement and the Discover Scuba Diving Review, informs you of some potential risks involved in scuba diving and of the conduct required of you during the PADI Discover Scuba Diving program. Your signature is required to participate in the program. If you are a minor, you must have the Participant Statement (which includes and acknowledges the Medical Questionnaire and the Liability Release and Assumption of Risk Agreement) signed by your parent or guardian.

You will also need to learn from the PADI Professional the most important safety rules regarding breathing and equalization while scuba diving. Improper use of scuba equipment can result in serious injury or death. You must be instructed in its use under the direct supervision of a qualified instructor to use it safely.

(continued, see center panel)

This card recognizes that you have attended and satisfactorily completed a PADI Discover Scuba Diving program. To dive without professional supervision, you must continue your education and become certified in the PADI Open Water Diver course. For more information about the PADI Open Water Diver course, visit your local PADI Dive Center or Resort. You can also visit padi.com.

Your Name _____

DSD Program Location _____

DSD Program Date _____ Instructor No. _____

Instructor Name _____

Instructor Signature _____

Discover Scuba Diving is not a scuba certification.

PADI Medical Questionnaire

Scuba diving is an exciting and demanding activity. To scuba dive safely, you must not be extremely overweight or out of condition. Diving can be strenuous under certain conditions. Your respiratory and circulatory systems must be in good health. All body air spaces must be normal and healthy. A person with heart trouble, a current cold or congestion, epilepsy, asthma, a severe medical problem, or who is under the influence of alcohol or drugs, should not dive. If taking medication, consult your doctor before participating in this program.

The purpose of this Medical Questionnaire is to find out if you should be examined by a physician before participating in recreational scuba diving. A positive response to a question does not necessarily disqualify you from diving. A positive response means that there is a preexisting condition that may affect your safety while diving and you must seek the advice of a physician.

Please answer the following questions on your past and present medical history with a YES or NO. If you are not sure, answer YES. If any of these items apply to you, we must request that you consult with a physician prior to participating in scuba diving. Your PADI Professional will supply you with a PADI Medical Statement and Guidelines for Recreational Scuba Diver's Physical Examination to take to a physician.

- ___ Do you currently have an ear infection?
- ___ Do you have a history of ear disease, hearing loss or problems with balance?
- ___ Do you have a history of ear or sinus surgery?
- ___ Are you currently suffering from a cold, congestion, sinusitis or bronchitis?
- ___ Do you have a history of respiratory problems, severe attacks of hayfever or allergies, or lung disease?
- ___ Have you had a collapsed lung (pneumothorax) or history of chest surgery?
- ___ Do you have active asthma or history of emphysema or tuberculosis?
